## Table of Contents

Perturb and observe maximum power point tracking method for photovoltaic systems using duty-cycle modulation <i>Theodore Louossi, Noël Djongyang, Olivier Thierry Sosso Mayi, Arnaud Nanfak .....</i>	159 - 175
Assessment of Grid Connected PEM Fuel Cell Power System using Matlab/Simulink Stateflow models <i>Hamza Bahri and Abdelghani Harrag .....</i>	176 - 200
End of life silicon based photovoltaic panels: A review <i>Sabiha Anas Boussaa, Abdelhak Benkrid, Naima Zaourar Boutarek, Messaouda Ayachi.</i>	201 - 216
Modélisation de l'onduleur photovoltaïque connecté au réseau électrique <i>Amar Hadj Arab a , Bilal Taghezouit a*, Kamel Abdeladim a, Smail Semaoui a, Saliha Boulahchiche a, Abdelhak Razagui a, Akila Gherbi a, Saida Bouacha a , Saida Makhlouli a, Salima Nemsy a , Abdelhak Djoudi .....</i>	217 - 235
Etude de performance des modèles large bande pour des conditions de ciel clair: cas de sud de l'Algérie <i>Said Benkaciali, G.Notton, C. Voyant, K. Gairaa .....</i>	236 - 258
Analyse d'un écoulement monophasique turbulent en présence d'un mélangeur statique de type Kenics <i>Hosni Massinissa, Hammoudi Mhamed .....</i>	259 - 281
Analyse comparative des ressources solaires de sites de centrales solaires thermodynamiques <i>Hichem Farsi .....</i>	282 - 303
Direct Torque Control of Two Series Connected Six-Three phases Motor Fed by Single Six Phases VSI Based on Optimum Vectors Selection <i>Chedni Yahia, Boudana Djamel, Nezli lazhari .....</i>	304 - 317
Techno-economic assessment of wind energy conversion systems for power generation for the city of N'Djamena in Chad <i>Marcel Hamda Soulouknga, Dumitru-Dorin Lucache, Serge Yamigno Doka, Timoleon Crepin Kofane .....</i>	318 - 330

## Editorial

The editor-in-chief thanks the editorial staff of the journal, the reviewers, and the administration of the CDER and researchers who contributed to the publication of this issue.

My sincere greetings go to the technical team who realized the platform of the journal, which is hosted on the CDER Server.
